## PRIMEFLEX for Nutanix Enterprise Cloud

### XF M2 Version

PRIMEFLEX for Nutanix Enterprise Cloud is a multi-cloud, multi-hypervisor platform that includes all the hardware and software to simplify procurement and deployment by using hyper-converged building blocks.

#### **PRIMEFLEX for Nutanix Enterprise Cloud**

A multi-cloud, multi-hypervisor platform that includes all the hardware and software to simplify procurement and deployment by using hyper-converged building blocks. It leverages high performance, energy-efficient FUJITSU PRIMERGY standard x86 servers and the software-defined compute, virtualization and storage technology in the Nutanix Acropolis cloud OS, Prism management and Calm orchestration. The result is reduced complexity and vastly superior TCO from this multi-cloud infrastructure environment.

#### **Need for speed**

PRIMEFLEX for Nutanix Enterprise Cloud provides support for industry-leading hypervisors, including the built-in Nutanix AHV hypervisor in combination with high speed flash disk devices and high-throughput, low-latency networking technology. You can therefore set up a high-performance, responsive virtual IT infrastructure that provides consistent IOPS with sub-millisecond response times. In all-flash or hybrid disk configurations, PRIMEFLEX for Nutanix Enterprise Cloud easily exceeds 250,000 IO Operations per Second (IOPS).

#### **Protect your business**

Built-in resiliency handles drive, server, or component failures – delivering continuous availability. If hardware fails, just swap it out; the software heals itself, with no complicated management steps.

#### **Grow as you go**

Scale your environment to an endless number of systems and unlimited storage. To scale out, simply add more system nodes. PRIMEFLEX for Nutanix Enterprise Cloud will automatically onboard new nodes and begin using them.

#### **Simplify infrastructure setup**

Once you have the systems mounted and cabled in a rack, the Linux or Windows operating system installed, and networking configured, you're looking at under 15 minutes to get the cluster configured.

#### **Simplify infrastructure management**

No specialized skill or expensive training is required – perfect for environments such as remote or branch office locations with limited IT staff to even the most demanding enterprise data centers. Integrated load balancing automatically migrates overly busy VMs to other system nodes in the cluster to ensure service levels are consistent. The Nutanix Prism management tool provides continuous built-in monitoring and alerting, and APIs make it easy to collect rich, cluster-wide performance and capacity metrics.

Nutanix Calm application lifecycle management and cloud orchestration accelerates application deployments into private or public cloud environments.

#### **Hardware advantages**

PRIMEFLEX for Nutanix Enterprise Cloud is fully tested and delivered on a high-performance and energy-efficient server platform for multiple leading hypervisor cluster environments – FUJITSU Server PRIMERGY powered by Intel® Xeon® processors. As well as excellent virtualization performance, the servers deliver the best economics in terms of density, energy consumption, heat dissipation and operating costs. In addition, Fujitsu provides intelligent and innovative system management solutions providing all the functions for failsafe, flexible and automated 24x7 server operations.

# Features and benefits

Main features	Benefits
Improve storage efficiency	Unique innovations offer better space and performance trade-offs than classic RAID configurations. Erasure coding and advanced compression deliver up to 4x greater storage efficiency.
Reduce storage costs	PRIMEFLEX for Nutanix Enterprise Cloud uses on-board storage local to each node. This reduces costs and eliminates the need for extra tools and training for managing complex external SAN infrastructures.
Flexible choice of leading hypervisors optimizes cost of virtualization	Customers can choose their preferred hypervisor ranging from the built-in Nutanix AHV to VMware ESXi. Customers have the option to also switch between hypervisors with a single-click migration.
Save floor space, power and cooling	The convergence of compute and storage resources in an industry-standard server reduces your infrastructure footprint, saves floor space, power and cooling expenses.
More time for value-added activity	Since server and storage management are consolidated, you can move valuable staff resources from infrastructure related management tasks to activities that create business value.

# Reasons to invest in PRIMEFLEX for Nutanix Enterprise Cloud

## Get fast time to value

Mitigate risk with turnkey factory integrated delivery and automated start up and benefit from 61% time savings to deploy, manage, and support.

## Enjoy high application performance

Get maximum performance with Fujitsu standard x86-servers delivering the most powerful virtualization platform leading 16 out of 21 VMmark benchmark categories.

## Unify infrastructure management

Get a centralized view of both the physical and logical infrastructure across multiple nodes, clusters and clouds – from hardware device level to network topology to virtual machines.

## Protect your business

Ensure your data is secure with a system that meets the most demanding government and commercial security standards. Achieve peace of mind with built-in automated security monitoring and self-healing.

## Reduce infrastructure costs

Profit from hyper-converged infrastructure using local storage with multi-hypervisor support and reduce costs for maintaining a complex external SAN infrastructure.

## Eliminate unplanned downtime

Built-in resiliency handles compute, storage, or network component failures – delivering 97% fewer unplanned outages.

## Increase network security

Get fully integrated physical and virtual networking and higher levels of security by leveraging micro-segmentation.

## Grow as you go

Get non-disruptive linear scalability for an endless number of systems, and an unlimited amount of raw storage.

## World-class support

Get 24/7 support for the complete hardware and software stack with a single point of contact.

## More time for value-added activity

Remove focus on maintaining infrastructure and move valuable staff resources to activities that create business value.

## Software

<b>Acropolis</b>	The Acropolis software pack is pre-installed on the aforementioned hardware and available in several editions to meet your infrastructure needs with the right capabilities.
<b>Starter</b>	Core set of software functionality. Ideal for Small-scale deployments with a limited set of workloads.
<b>Professional</b>	Rich data services, resilience and management features. Ideal for running multiple applications or large-scale single workload deployments.
<b>Ultimate</b>	The full suite of Nutanix software capabilities to tackle complex infrastructure challenges. Ideal for multi-site deployments and advanced security requirements.
	Further information and the individual features of the Acropolis software editions can be found on the website <a href="https://www.nutanix.com/products/software-options/">https://www.nutanix.com/products/software-options/</a>
<b>Nutanix Add-Ons</b>	Licenses for additional Nutanix software features.
<b>Prism Pro</b>	Nutanix Prism Pro improves the quality and efficiency in IT operations for the modern datacenter. Powered by the machine learning and task automation, Prism Pro intelligently optimizes capacity, proactively detects performance anomalies, and enables the IT team to automate operations tasks with ease and confidence.
<b>Prism Ultimate</b>	Nutanix Prism Ultimate adds application discovery and monitoring, budgeting/chargeback and cost metering for resources, and a SQL Server monitoring content pack.
<b>Files</b>	Nutanix Files is a software-defined scale-out file storage solution designed to address a wide range of use cases, including Linux support and Windows home directories, user profiles and department shares.
<b>Objects</b>	Nutanix Objects is a software-defined object storage solution. It's designed with an S3-compatible REST API interface to handle terabytes to petabytes of unstructured data, all from a single namespace.
<b>Flow</b>	Nutanix Flow delivers advanced network security, providing visibility into the virtual network, application-centric protection from network threats, malware, and ransomware and security and compliance monitoring.
<b>Calm</b>	Nutanix Calm is a multi-cloud application management framework. Calm provides application automation and lifecycle management natively integrated into the Nutanix Platform.
<b>Mine with Veeam</b>	For system admins responsible for uptime and recovery SLAs of mission critical applications and data Nutanix Mine with Veeam deploys Veeam Cloud Data Management integrated with Nutanix storage management for a solution that reduces the time and complexity of data protection across the data center and the cloud.
