5 reasons for vSAN

#1: Natively Integrated

vSphere integrated HCI simplifies architecture, enhances security and maximizes performance

Seamlessly deploy, operate and manage with vSphere and vCenter integration

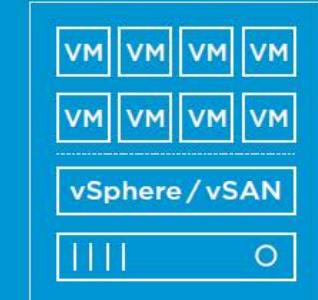

Native HCI encryption delivers cost savings and simplified key management

Turn-key compatibility with services: Backup, Replication, HA & DR

Native integration with vSphere and vSAN

vSAN In-Kernel HCI

- 2X CPU and 3X Memory Efficiency
- Native vMotion and DRS
- Simple, single management pane

Native data-at-rest encryption:

- Experience native HCI security with software-defined, data-at-rest encryption
- Hardware independent and does not require self-encrypting drives
- Works seamlessly with space efficiency features like deduplication and compression

Low overhead,
10x lower latency

“
If it's critical, it's probably going to go on vSAN.
- HERBALIFE
NUTRITION
”

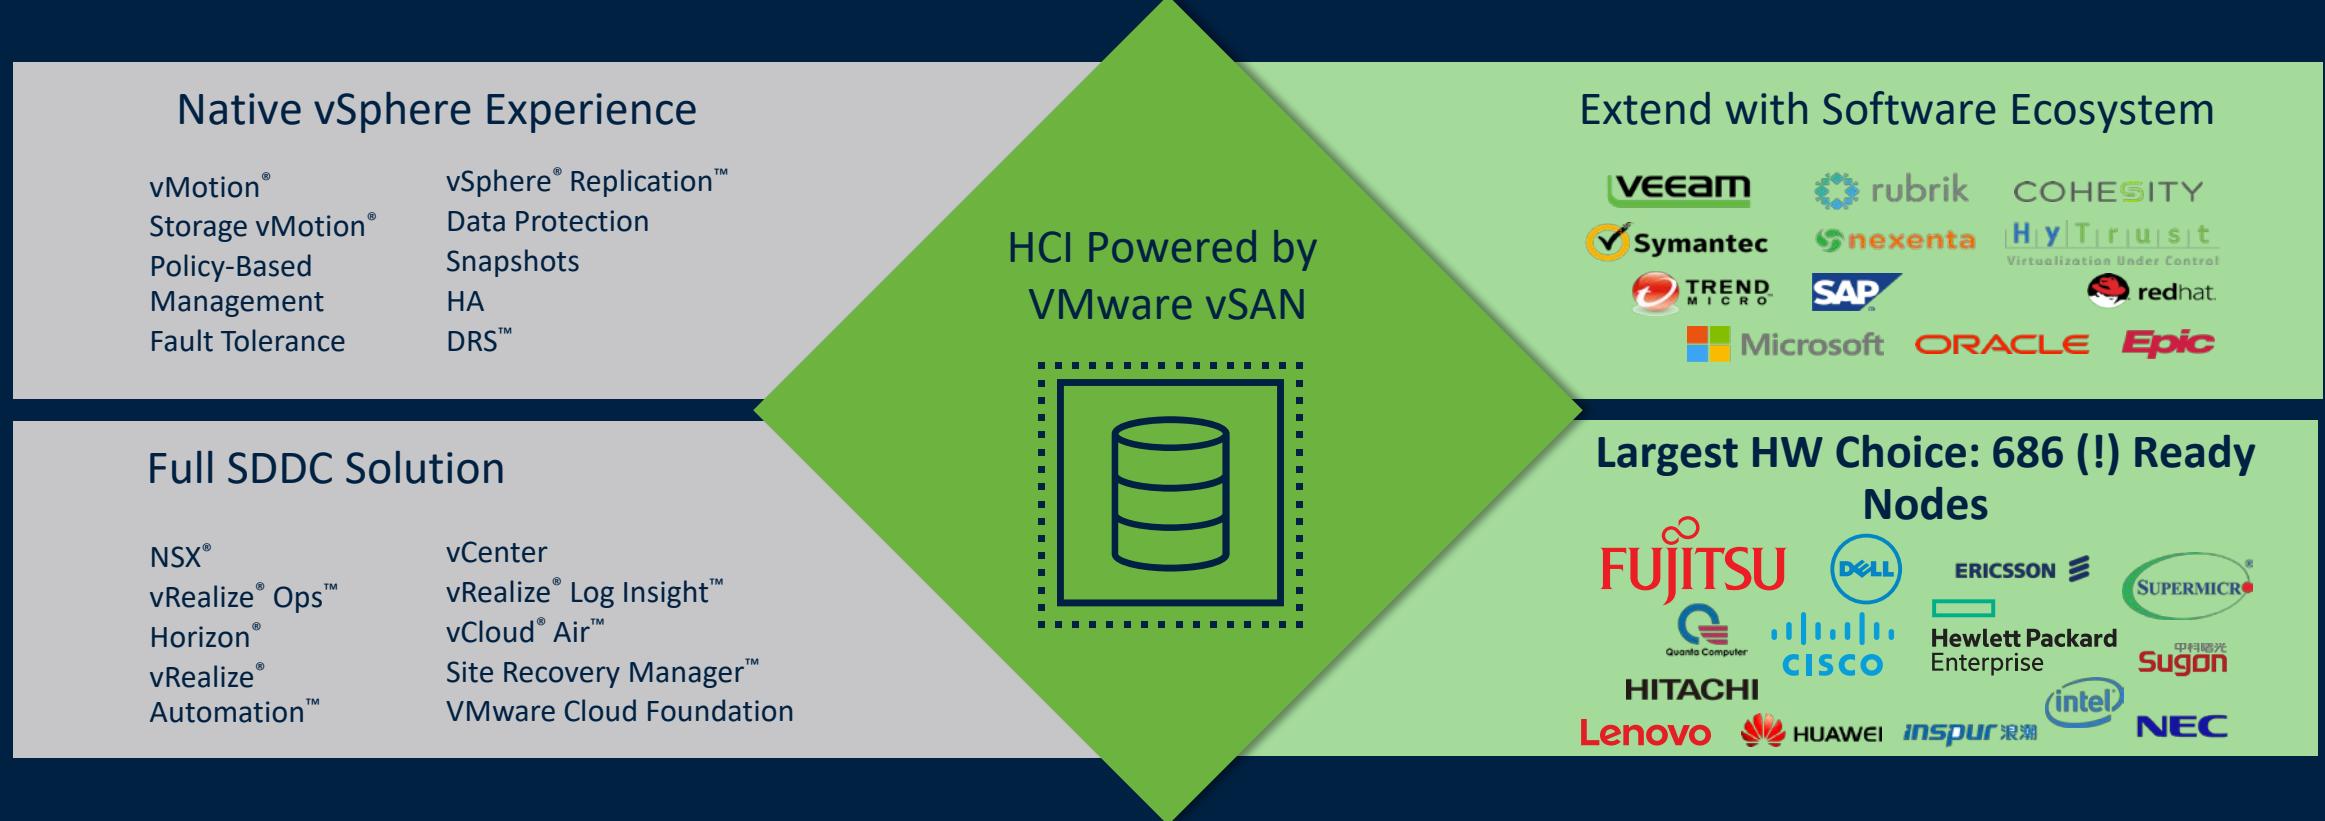

Less Overhead by full integration in agnostic Hypervisor

- ✖ Storage VM consumes resources
- ✖ Data paths are inefficient
- ✖ Additional management bolted on

- ✓ More efficient CPU and memory utilization
- ✓ Hardware-agnostic HCI encryption
- ✓ Leverages vCenter management skills
- ✓ Native vMotion and DRS

Prepare for a Full-Stack, Digital Foundation for Edge to Cloud to Datacenter

5 reasons for vSAN

#2: Lower CapEx

Experience the benefits of HCI with the lowest dollar per IOPS

Leverage x86 server economics from your vendor of choice

Leverage the latest server platforms without waiting for lengthy hardware refresh cycles

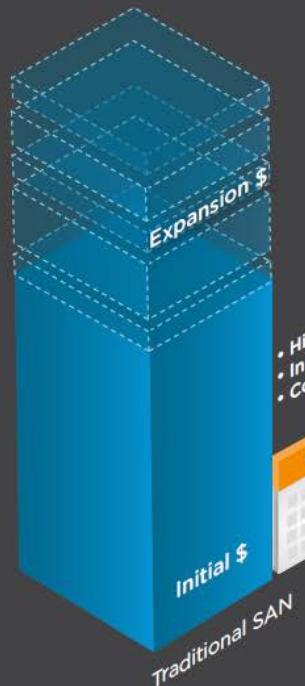

Buy just what you need, scale up or out with ease

Up to
50%
CapEx savings*

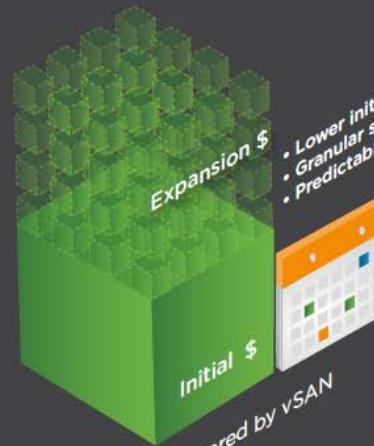

You want to do more with less. vSAN lets you do that.

- TRAVELERS

- High initial investment
- Inconsistent scaling
- Complex planning

- Lower initial investment
- Granular scale up and out
- Predictable outcome

5 reasons for vSAN

#3: Operationally Simple

Roll out infrastructure and applications with ease and limited training

Align storage policies with workloads, not with storage hardware constructs

Enable faster delivery of services with reduced staff overhead

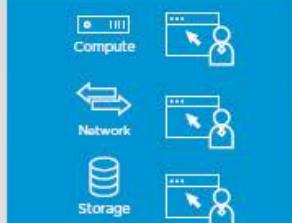

Experience faster learning curve with a familiar and extensible management solution, vCenter

It really helps that we don't have to train for that extra expertise on the storage side.

SEKISUI
DIAGNOSTICS

Environment with Traditional Enterprise SAN

Hyper-Converged Infrastructure

One tool. One team.

What used to take our users 30 to 45 minutes to accomplish in the old environment, now takes less than 5 minutes!

5 reasons for vSAN

#4: SDDC and Cloud Ready

Futureproof HCI with the widest deployment options - even public cloud

Software-Defined Data Center (SDDC)

MANAGEMENT (CMP)

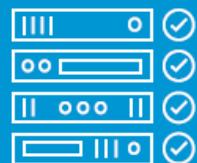

NETWORKING (NSX)

STORAGE (vSAN)

SERVER VIRTUALIZATION (vSphere)

Flexible Deployment

Ready Nodes

Turnkey Appliances

Private Cloud - Rack Scale

Cloud

“

The beauty of vSAN is that it gives us choice.

- ADP®

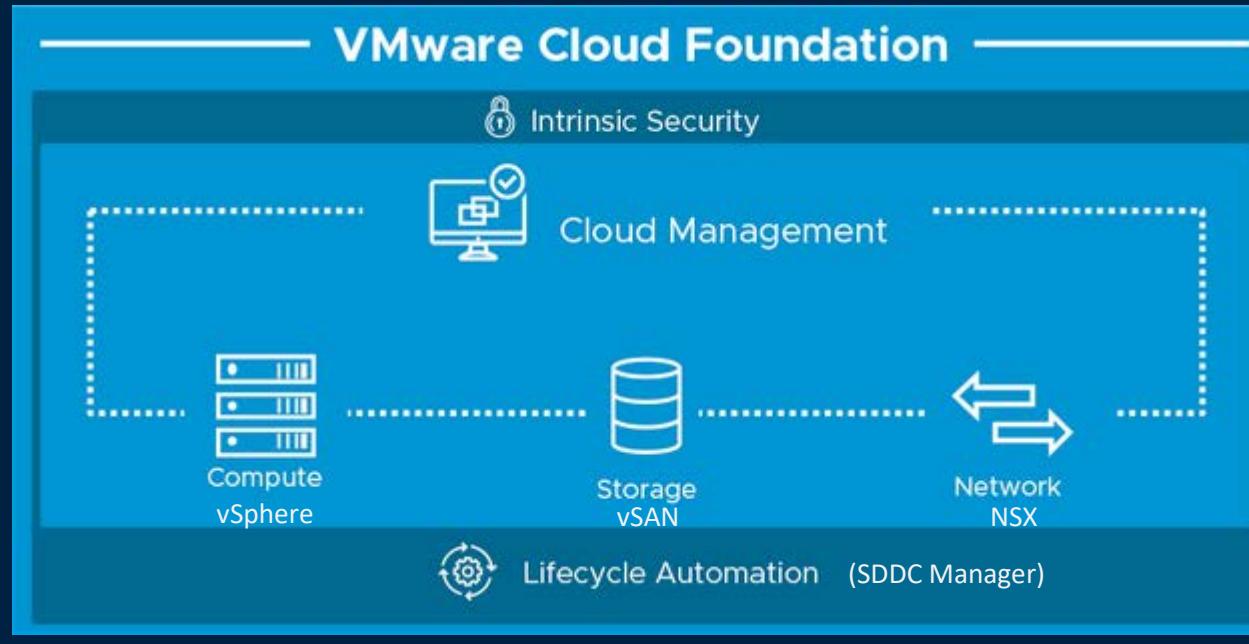

”

Built by VMware, vSAN works with the breadth of VMware solutions like NSX, Horizon and vRealize. Combine vSAN with NSX to deploy a full software-defined data center.

VMware Cloud Foundation

Unified SDDC Platform For The Hybrid Cloud

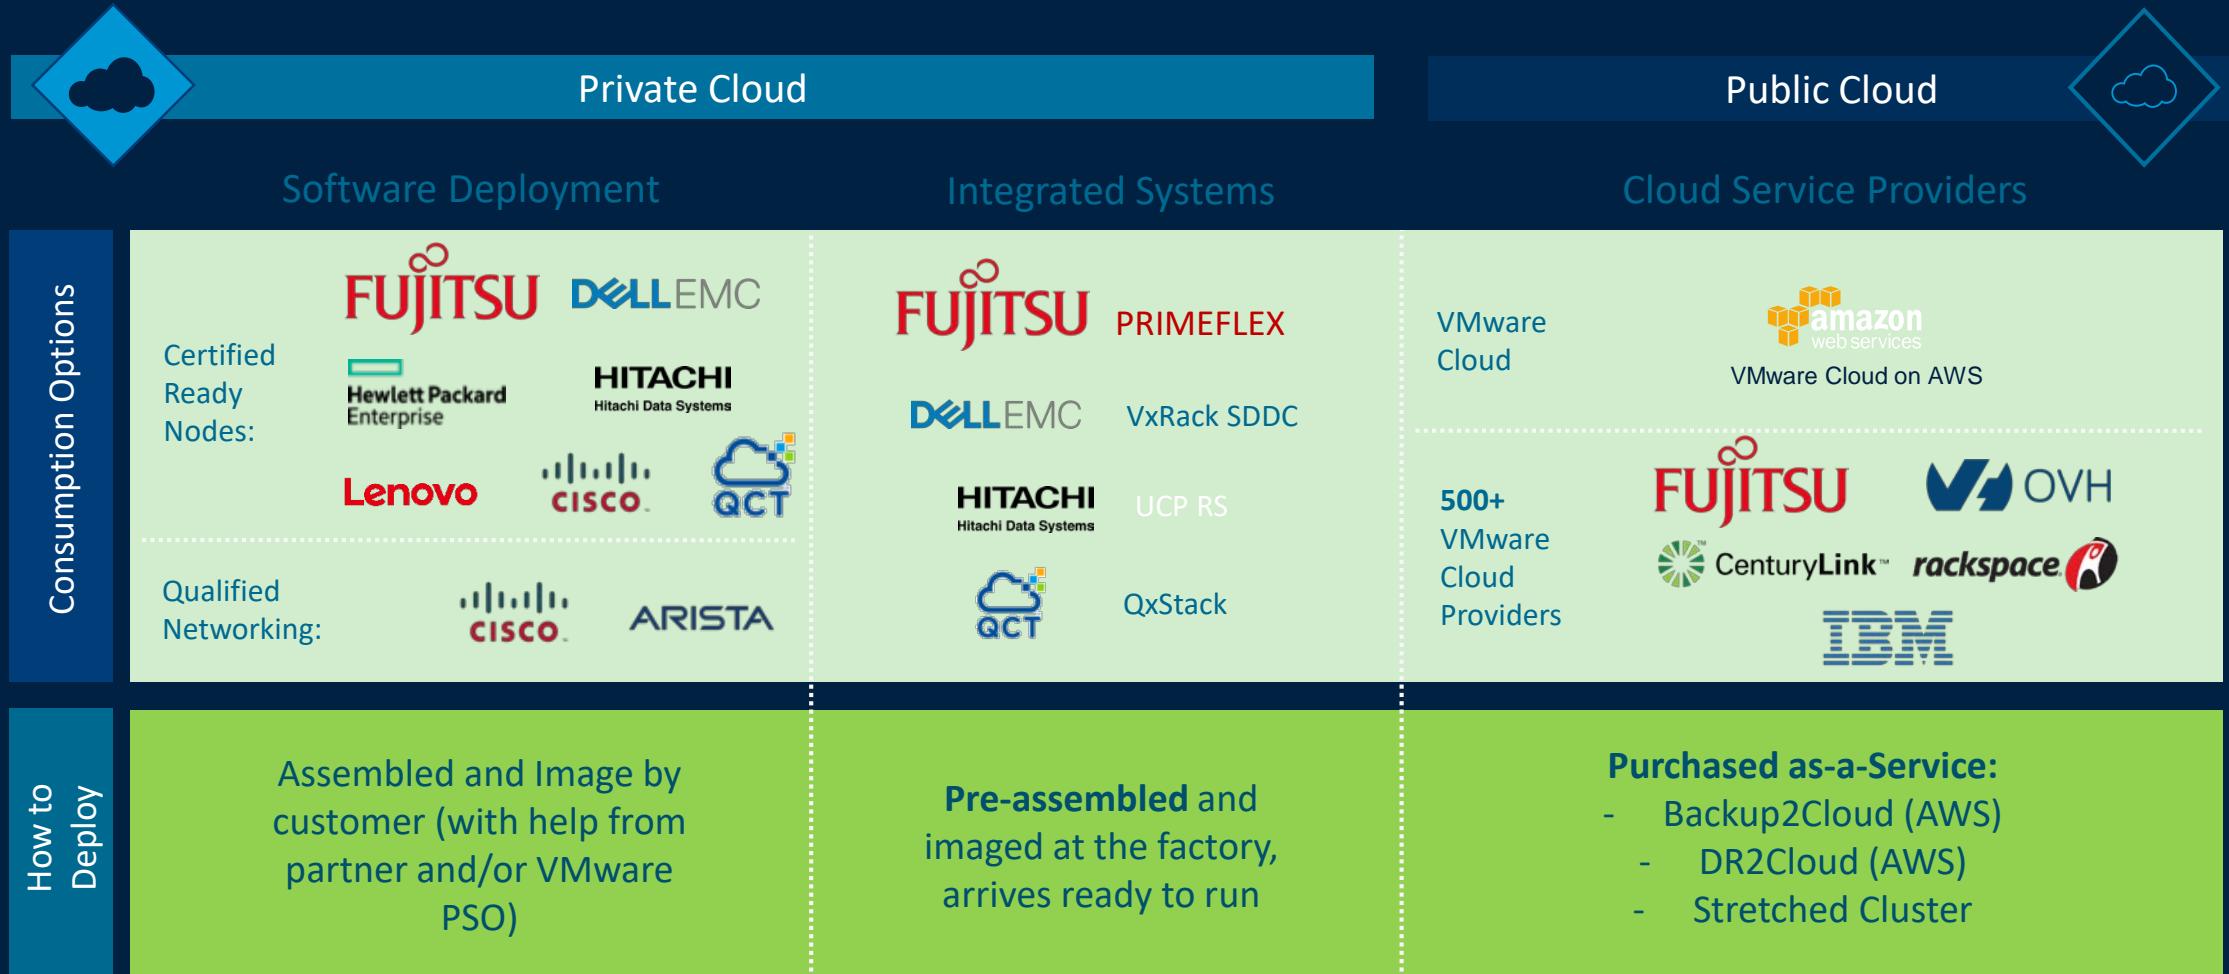

vmware®

- Next generation hyper-converged platform
- Natively integrated cloud infrastructure stack: vSphere, vSAN, NSX, vRealize Suite
- Automates deployment and lifecycle of SDDC with VMware SDDC Manager
- Universal platform for any applications
- Available across private and public clouds

Broadest Partner Ecosystem and Flexible Consumption Options

Deploy VMware Cloud Foundation on premises and consume it as a Service

5 reasons for vSAN

#5: Natural expansion of market leading virtualization stack

vSAN fastest VMware product since ESX

>15.000 Customers

A timeline bar chart showing the growth of vSAN customer adoption over a 4-year period. The x-axis lists quarters from Q1'14 to Q2'19. The bars represent the number of customers, starting very low in Q1'14 and rising steadily to over 15,000 by Q2'19.

Quarter	Customer Count
Q1'14	~100
Q2'14	~200
Q3'14	~300
Q4'14	~400
Q1'15	~500
Q2'15	~600
Q3'15	~700
Q4'15	~800
Q1'16	~1,000
Q2'16	~1,500
Q3'16	~2,000
Q4'16	~2,500
Q1'17	~3,000
Q2'17	~4,000
Q3'17	~5,000
Q4'17	~6,000
Q1'18	~7,000
Q2'18	~8,000
Q3'18	~9,000
Q4'18	~10,000
Q1'19	~11,000
Q2'19	~12,000

vSAN Customer Adoption

5 Fragen zu HCI, die Sie sich
bei der Auswahl stellen sollten:

1. Welches ist Ihr Hypervisor für Business Critical Workloads?
2. Welcher HCI-Anbieter unterstützt alle mir wichtigen Funktionen auf meinem gewählten HV?
3. Welcher Hypervisor bietet das größte Eco-System und beidseitigen Support?
4. Ist das Lizenziertionsmodell transparent und kann ich alle Folgekosten nachvollziehbar kalkulieren (SnS-Verlängerung, Nachkauf-Konditionen, etc.)?
5. Welcher Hersteller unterstützt HEUTE bereits - und ZUKÜNFTIG - meine Cloud-Strategie (Private- / Hybrid- / Multi-) ?

Thank You
