

Media Backgrounder

Fujitsu Laboratories of Europe

July 2020

Fujitsu Laboratories is represented in Europe by Fujitsu Laboratories of Europe, working to create an aspirational digital society underpinned by the concept of “trust”.

Established in 2001 and with an active presence in Europe since 1990, Fujitsu Laboratories of Europe’s activities are focused on the creation of cutting-edge innovations, helping to realize successful Digital Transformation (DX) strategies based on trusted digital technologies.

Fujitsu Laboratories of Europe is considered one of the leading research and development centers in Europe, with its wide range of R&D and co-creation activities focusing on ground-breaking technologies that address real-world challenges facing business and society, underpinned by ethical concepts.

By adopting a co-creation strategy and working with customers and collaboration partners, our current extensive R&D and co-creation activities span:

- **Artificial Intelligence**, with R&D including AI Ethics, Explainable AI (XAI) and Genome AI
- **Digital Transformation**, encompassing Diagnostics & Prediction, Digital Analysis and Cyber Physical Systems
- **Trusted Technologies**, including Corporate Trust, and AI for Cyber Security
- **Advanced Computing**, including Next Generation Architecture, and Digital Annealer applications

Fujitsu Laboratories of Europe’s activities are spread between our UK HQ near Heathrow outside London, and our Data Analytics Centre in Madrid, employing some 50 staff including highly skilled data scientists and researchers.

Research Vision

Fujitsu Laboratories plays a crucial role in enabling Fujitsu’s co-creation and digital transformation strategy. Co-creation is the cornerstone of our activity – working with customers and Fujitsu businesses to solve real-world problems in today’s digital society.

We are committed to putting the concept of “trust” into everything we do, applying our cutting-edge technologies to solve previously unimaginable or unsolvable problems. By working to make the impossible possible, we are enabling our customers and society to achieve incredible new heights.

A key part of this process involves creating new value through “co-creation” with multiple and diverse stakeholders around the world. Open Innovation is an essential element to our work, working with some of the region’s highest profile initiatives, including AI4People and the European Union’s Horizon 2020 program, as well as playing an active role in standards development activities. We also work closely with many prestigious academic institutions and research organizations across EMEA, establishing collaborative ties that are pivotal to realizing our research vision.

Central to our operational philosophy is working collaboratively with our sister companies across the Fujitsu Group – improving our understanding of customers’ business requirements and channeling this into the R&D process.

We are all working together, co-creating to deliver innovation and digital transformation, and above all, achieve a better world to live in.
