

Do incredible things – with FUJITSU Cloud Service K5

The most open, agile and compatible
cloud platform on the market today.

When you can trust your IT
Services completely you can
do these incredible things...

Increase efficiency

Get the efficient operations your business expects

Key benefits:

- Reduce development time, operating costs and capex
- Maximize interoperability; minimize vendor lock-in
- Innovate with minimal risk

Innovate faster

Develop, prove and release your innovations quicker

Key benefits:

- Build, test and deploy new services easily
- Increase innovation and limit risks and costs
- Make the most of current systems and investments

Exploit hybrid IT

Gain a safe and secure model for robust, fast – and other – IT

Key benefits:

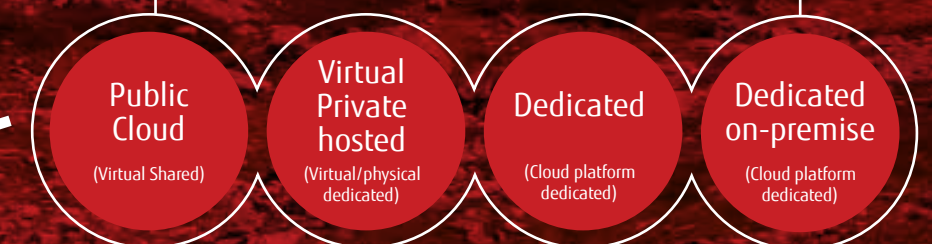

- Have one stack across public, private and hybrid clouds
- Implement new services quickly and easily without migrating from one platform to another
- Focus on innovations that work and scale them up quickly

A unique platform for digital transformation

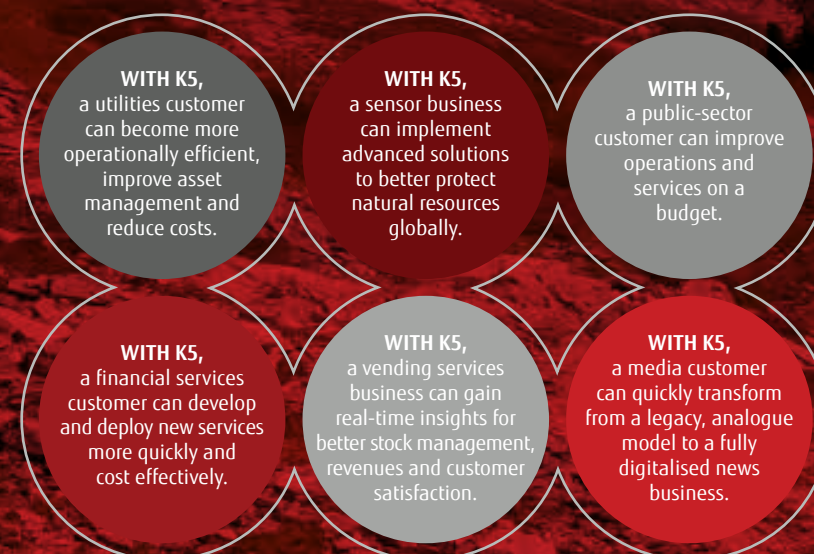

K5 is already one of the world's largest OpenStack cloud platform. What's more, we've:

- Integrated it with market-leading cloud-application-development tools
- Fully-integrated with platform services from APIGee, Cloud Foundry, and System Factory to breathe life and pace into an optimised enterprise
- Incorporated the leading API management toolset
- Created highly automated workflow and blueprint management for hybrid clouds
