“Society 5.0” by achieving SDGs

Current society

Knowledge and information are not shared and cross-sector value is difficult to create.

IoT will connect all people and things, all sorts of knowledge and information will be shared, and totally new value will be born.

Current society

A variety of constraints exists with respect to social problems such as the aging society and regional depopulation making a sufficient response difficult.

Social issues will be overcome and humans will be liberated from various types of constraints.

Society 5.0

AI will free humans from the burdensome work of analyzing huge amounts of information.

Current society

With an overflow of information, the work of finding and analyzing the information desired is difficult and burdensome.

The possibilities open to humans will expand through the use of robots, automatic-driving cars, etc.

Current society

People do a large amount of work, their abilities had limitations, and the behavior of the physically challenged is constrained.
