Cloud and Digital Transformation

Cloud allows customers to
focus their energy on building what differentiates
them: **customer focused applications**

This is the heart of **Digital Transformation**

The Power of Cloud

The application under the name EasyGlucose* the student of the University of California, Los Angeles (UCLA) Bryan Chiang (18 years). He became the winner of the competition Microsoft Imagine CUP 2019.

The current method

The future method

*Patent pending

What is Azure?

Microsoft Azure is an platform
which allows you to

write

run and

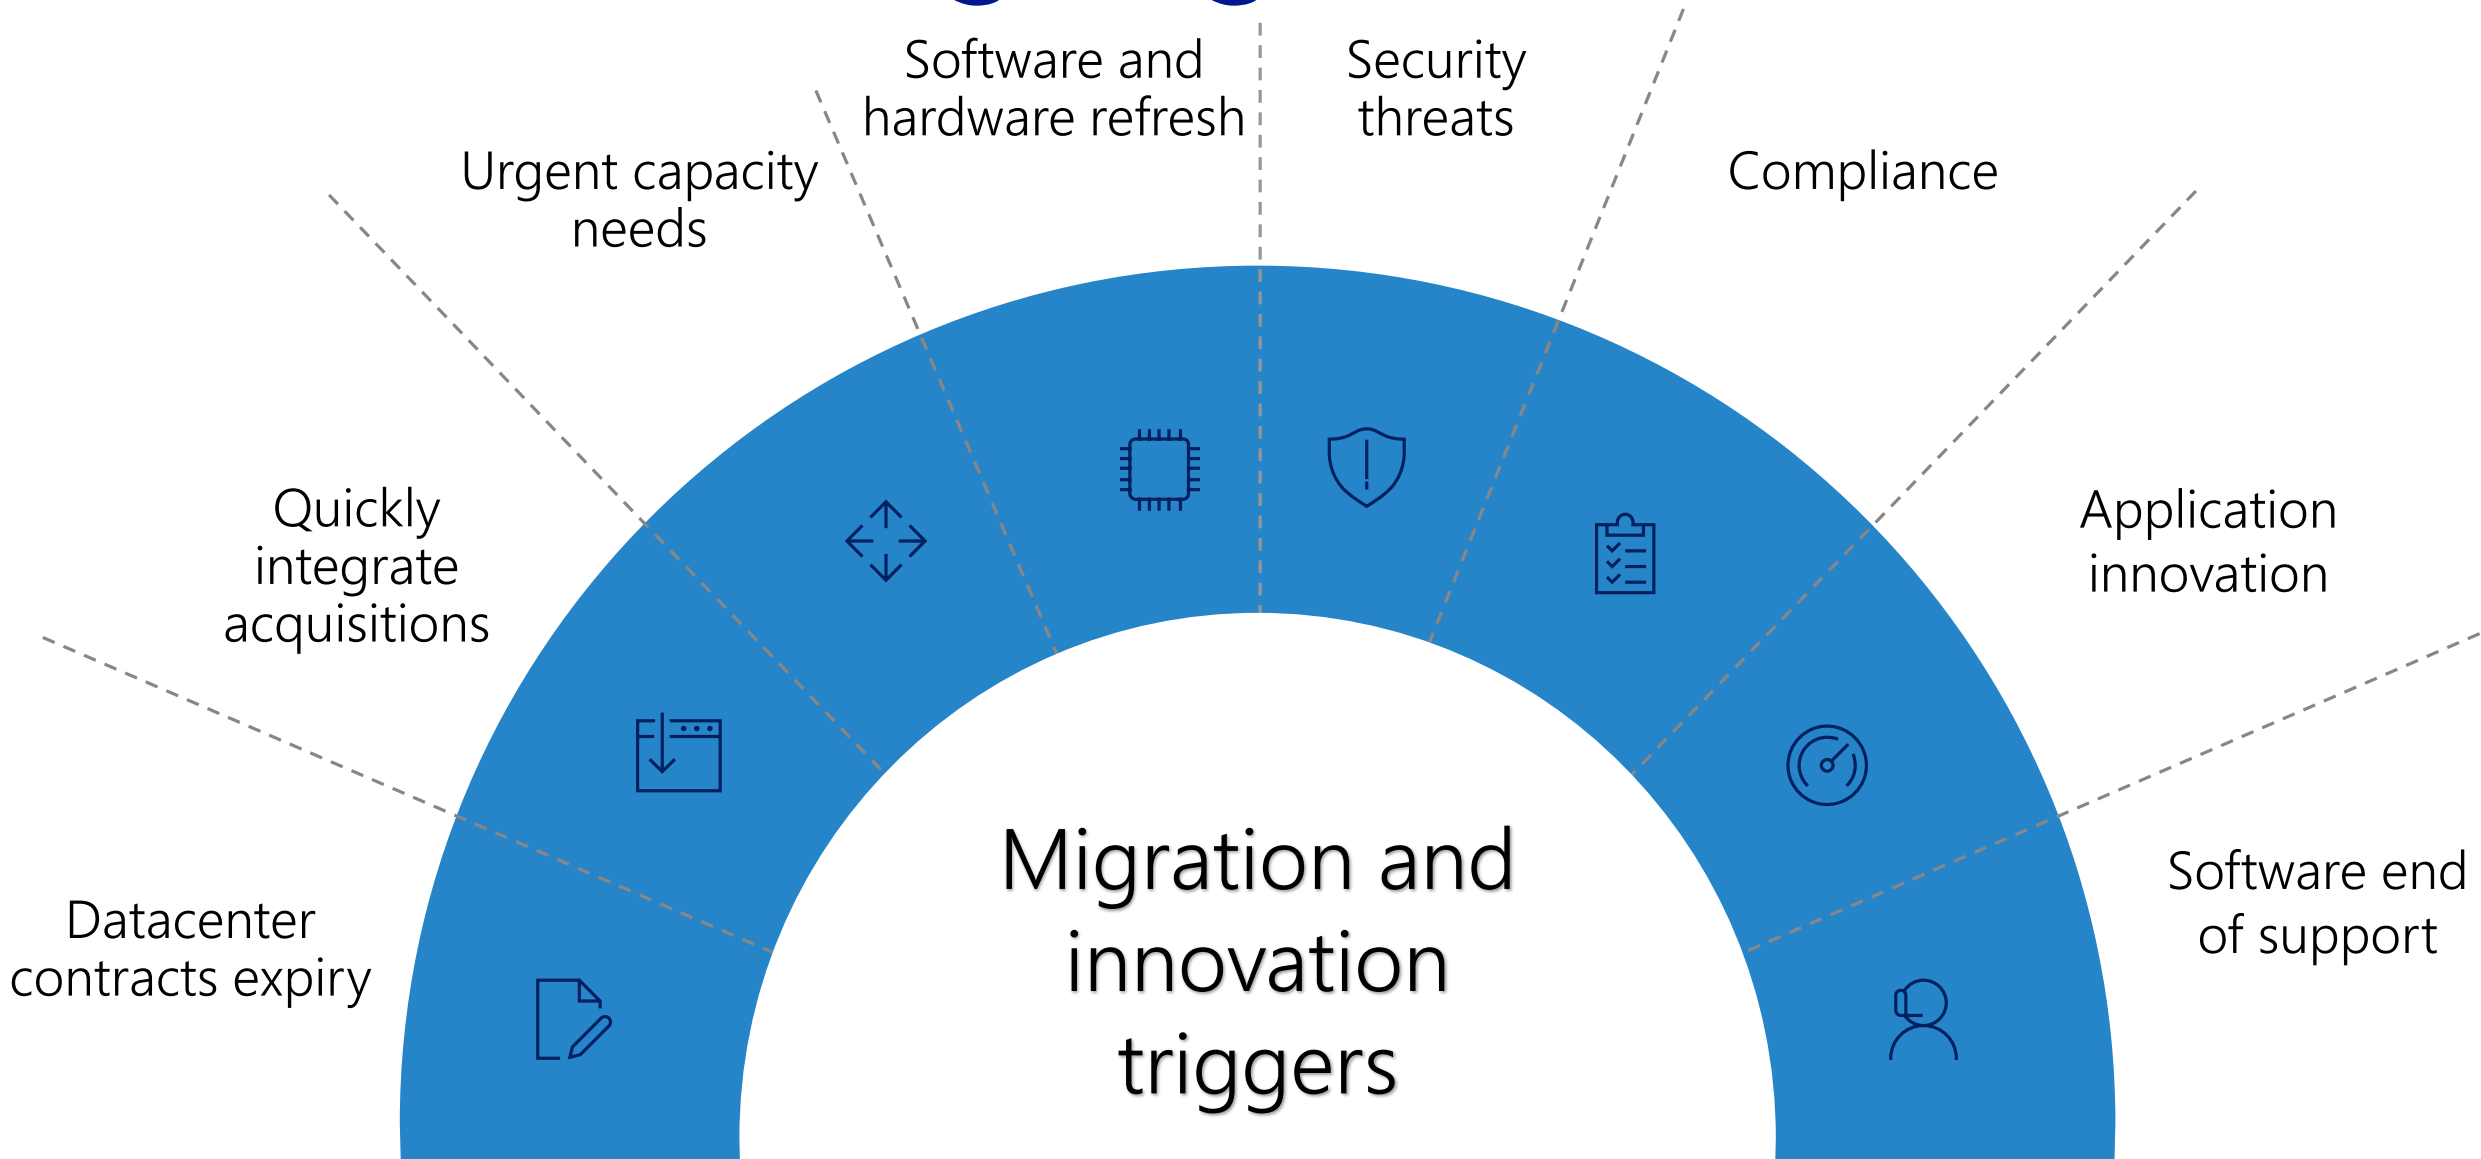

use

software

What's driving
migrations to
Azure?

What's driving migrations to Azure?

Infrastructure is the core of digital transformation

On-demand

Compute

Networking

Storage

Purpose-built

NetApp™

CRAY

vmware®

Linux and open source

> 50%
of Azure VMs are
running Linux

1.4x
growth of Linux

Red Hat

Co-located support
with Red Hat & SUSE
on-site team

Best choice for Microsoft workloads

Cost savings

Easy migrations

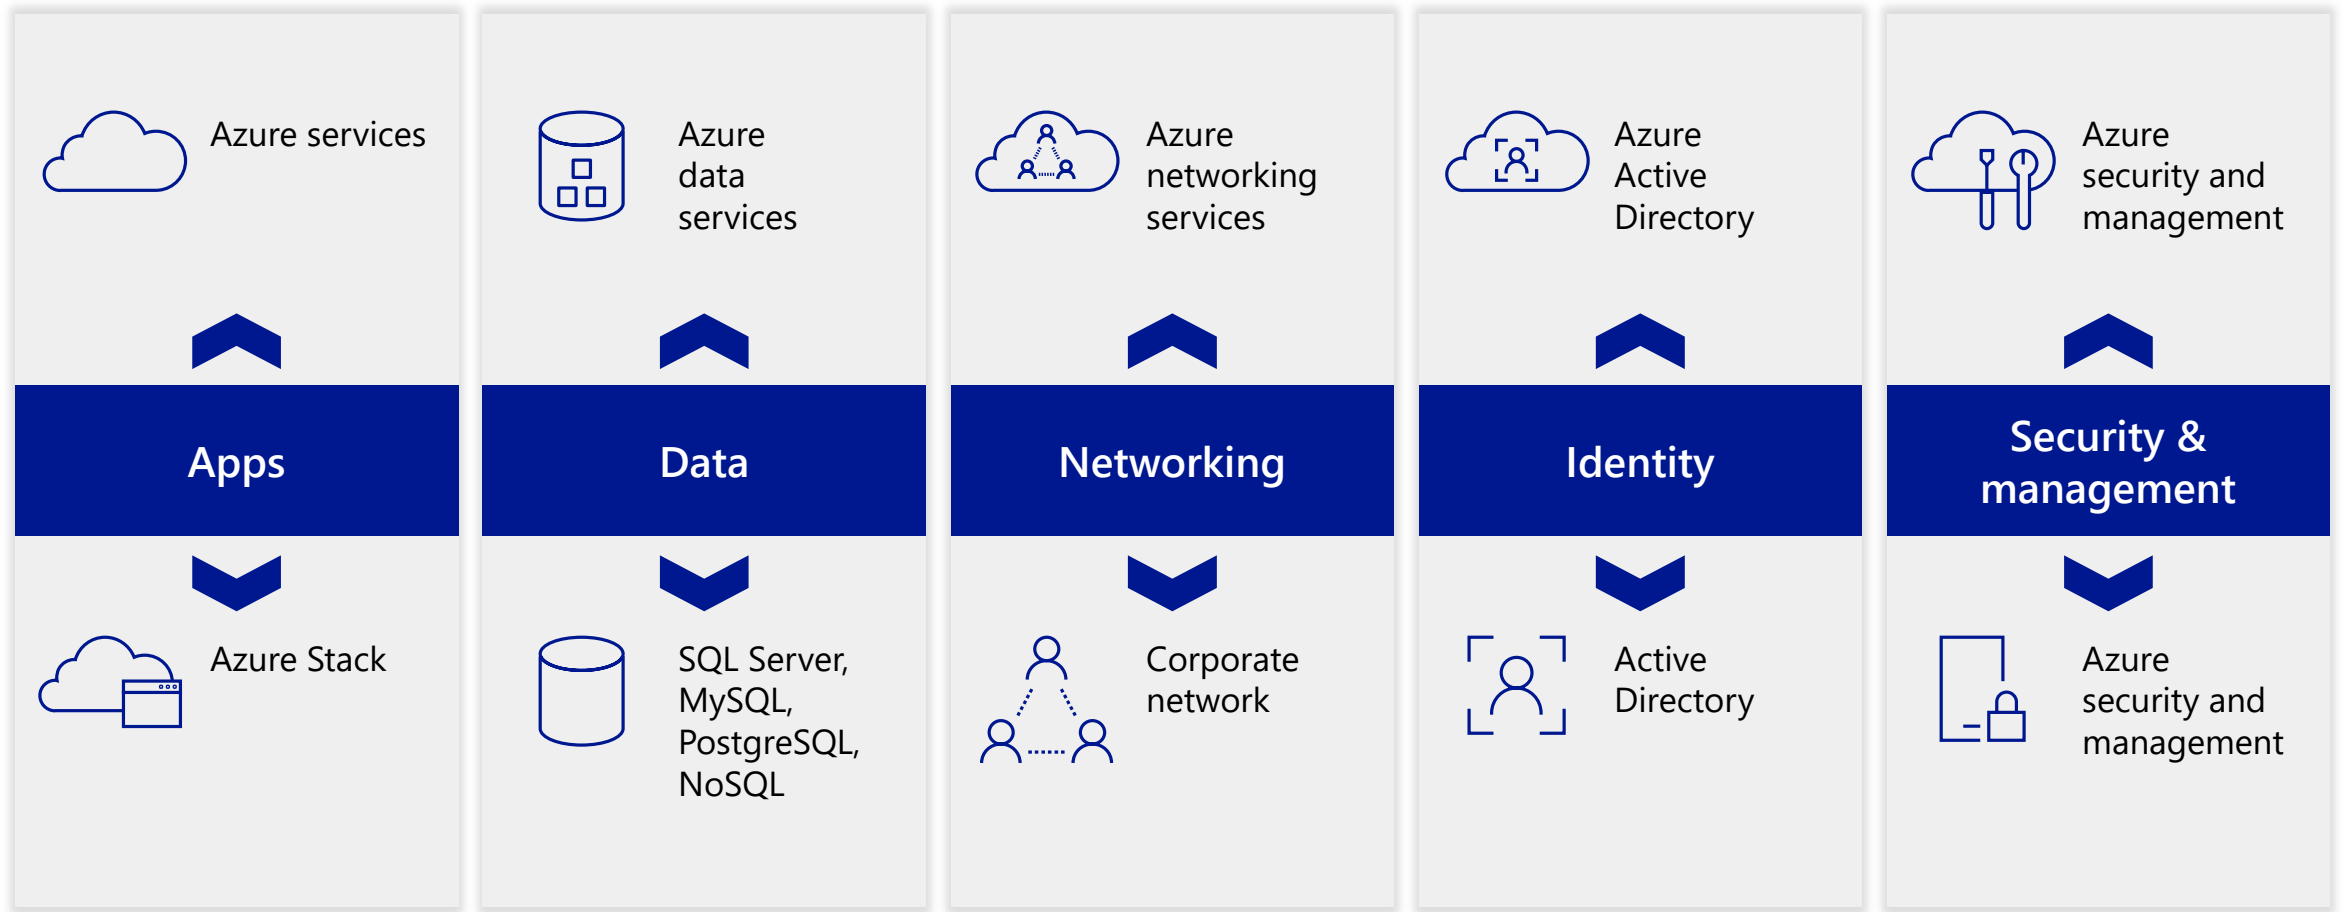

First-party support

Modernize apps beyond
infrastructure

Hybrid Cloud

Azure is the only consistent, comprehensive hybrid cloud

Hybrid Platform

Hybrid platform

Azure meets your workloads where they are

Use public cloud services

For on-demand, self-service computing resources to migrate and modernize existing apps and build new cloud-native apps

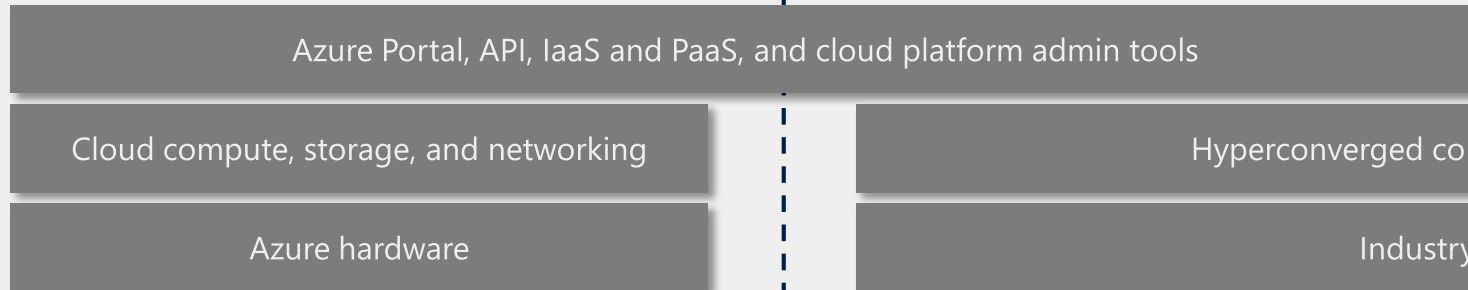

Operate cloud services on-premises

Build and run cloud applications at the edge, when disconnected, or to meet regulatory requirements using consistent Azure services on-premises

Run virtualized applications on-premises

Run virtualized applications on-premises, replace and consolidate aging server infrastructure, and connect to Azure for cloud services

Azure

Azure Stack

Azure Stack HCI solutions

On-premises

What I use...

More than 100 services available in 54 regions around the globe

What I use...

Azure VMs for Windows and Linux
Azure Web Apps and Functions
Azure Key Vault
Azure Resource Manager
Azure Marketplace
IOT Hub/Event Hub
Admin tools (Plans, offers, RBAC, etc.)

What I use...

Validated HCI solutions powered by Hyper-V and Storage Spaces Direct in Windows Server 2019 SDDC
Windows Admin Center for management and integrated access to Azure services such as:
 Azure Backup
 Azure Site Recovery
 Azure Monitor and Update Management
And more
