

# Smart display solutions for new workspaces

FUJITSU Displays  
A feast for your eyes

FUJITSU

shaping tomorrow with you

# Your go-to displays for a smart office environment

Back-to-back videoconferences, followed by intricate work on side-by-side spreadsheets? Fast typing in a multi-page document, then presenting to colleagues over a remote link? Designing a graphic that needs utmost color fidelity, and next on the agenda is producing a video? In every smart, connected workplace, the display is the gateway to productive multitasking. And with more people than ever adopting flexible working, moving between homes and offices, it is vital to have the same excellent standards everywhere.

When you choose a display from Fujitsu, you will never have to compromise. With display solutions for every user profile, from CAD and finance experts to mainstream office admin, and in sizes from 19 to 34 inches, ultrawide, curved or flat, Fujitsu displays are the heart of smart workplaces in the digital economy.

Discover how Fujitsu displays can transform your viewing experience!

# Health first: A smart view on wellbeing at work

Your choice of display makes a huge difference to health and wellbeing in the workplace. With Fujitsu, you have the confidence that you have made the right decision. We work with leading research organizations such as Fraunhofer Institute for Labor Economics and Organization (IAO) to create human-centric products and solutions. Our displays put people first – with features that are designed to enhance wellbeing at your desk, and keep you productive during the hours you work.

## Working for a healthy environment

FUJITSU Displays are recognized and certified by leading environmental agencies such as EPA, EPEAT and TCO for their energy efficiency and impact on the environment. Our displays are up to 98% recyclable, helping to protect the environment for future generations.

Ultrawide viewing with IPS technology for clarity from any perspective

Keep your eyes healthy: Certified by German TÜV, FUJITSU displays are flicker-free, and with reduced blue-light emissions

6-in-1 flexibility: tilt, swivel, height-adjust and rotate your display to exactly the right position for you

# FUJITSU Displays for every profile

Fujitsu displays strike the perfect balance between cutting-edge performance, usability, and reliability. With three product lines (each with a range of different models), you can easily find the right model for your line of work.

## E-LINE

Ideal for home and office environments designed for energy savings and economy

- Screen sizes: 21.5 inches (54.6 cm) to 23.8 inches (60.5 cm)
- Great viewing with In-Plane-Switching (IPS) technology
- 10-finger touch version available
- Energy efficiency: ECO operation mode, ECO key and Status LED
- "Backpack solution" for mounting Fujitsu FUTRO Thin Clients and ESPRIMO Q Mini PCs at rear of display
- Integrated speakers

## B-LINE

Designed for the rigors of medium to large organizations, with a special emphasis on health and wellbeing features and 24/7 use

- Screen sizes: 19 inches (48.3 cm) to 31.5 inches (80 cm)
- 5-in-1 stand (height-adjust, tilt, swivel, pivot, cable guide), picture over desk (down to 40mm)
- Built-in speakers and headphone connectors
- Tactile keys front-side with haptic & sonic feedback, Eco button, multi-color status LED
- DisplayView™ software: configure display via mouse (including split screen and multi-monitor control)

## P-LINE

P-line Superior displays are your choice for the uncompromising modern workplace

- Screen sizes: 23.8 inches (60.5 cm) to 34.1 inches (86.7 cm)
- Frameless IPS panels with 100% coverage up to 138%
- sRGB color space and up to 98% DCI P3 for maximum visual pleasure
- 6-in-1 stand: stand (height-adjust, tilt, swivel, pivot, cable guide, ready for backpack solution)
- Built-in sensors: presence detection, Auto Brightness Control (ABC)
- Built-in speakers (2x2W), headphone connectors
- USB Type - C docking: with 65W charging, DP Alternate Mode
- DisplayView™ software: configure display via mouse (including split screen and multi-monitor control)

# Save energy with smart display solutions

FUJITSU Displays with built-in sensors\* are designed to maximize your energy savings – for the benefit of the environment and your power bills.

## Presence-sensing

The display goes into sleep mode when you are away from your desk – and senses your presence when you return. For extra security, access is password-protected

## Auto Brightness Control (ABC)

Bright sunlight? Gloomy winter afternoon? Your Fujitsu display measures ambient lighting conditions and adjusts brightness to save energy

## Workplace Lighting Guide

Your display alerts you if ambient light is too strong or weak, helping you to avoid unnecessary eye strain

\* Available in select models

# Meet the clean desk challenge

Space often must double up for other purposes. A desk at home might be in the living space. A desk in the office could be used for a drop-in work session, to be taken over by another user later. A clean desk helps to keep space flexible.

Fujitsu offers displays to keep your space clear – featuring one-cable docking systems to eliminate cable clutter, and flexible arms as stands that you can adjust to one height for working, and another for videoconferencing. Fujitsu Client Computing Devices can be hooked to the display's arm and share its power supply, On/Off key, and LED indicator.

# Meet the clean desk challenge

It takes two: dual monitor setups

Fujitsu offers displays to keep your space clear – featuring one-cable docking systems to eliminate cable clutter, and flexible arms and stands that you can adjust to one height for working, and another for videoconferencing. Fujitsu Client Computing Devices can be hooked to the display's arm and share its power supply, On/Off key, and LED indicator.

## Clean screen: on-screen organization for more productivity

Good organization makes complex tasks easier to manage – and Fujitsu displays with DisplayView™ help you to bring structure to your task layout. The split screen software allows you to embed applications into your choice of layout, so you never lose track of what you are working on. The app is automatically sized to the selected window.

# Display Quick Finder

Spoilt for choice with the impressive range of Fujitsu displays available? This Quick Finder will help you to locate suitable displays. Recommendations are based on typical requirements for small and medium-sized enterprises.

## CAD

Fast performance to run complex software, fine resolution for intricate on-screen detail
