

Fujitsu Displays

The evolution  
of quality

#ClearlyTheBest

Can't find a display that is ergonomic and equipped with features that suit long working hours?

Struggling with insufficient connectivity functions and your choice of interfaces?

Experiencing inferior color quality on your screens due to poor calibration?

## Presenting the new 10<sup>th</sup> generation Fujitsu Displays

With display solutions for every user profile, from CAD and finance experts to mainstream office admin, and in sizes from 19 to 34 inches, ultrawide, curved or flat, Fujitsu Displays are the heart of smart workplaces.

Do not compromise on performance or comfort. Transform your workspace with **the best** of both worlds.

The new 10<sup>th</sup> generation Fujitsu Displays offer the right screen for any environment, enabling uninterrupted productivity. No matter what you do, Fujitsu Displays will deliver the best performance, flexibility and business value.

# Innovation in every step

## Bright & full HD displays

- Screen resolution ranging from FHD to UWQHD for standard & special scenarios.

## Integrated webcam

- Microsoft Windows HELLO\* compatible with mechanical lever lock.

## Multi-monitor & split-screen usage

- Supports both multi-monitor and split-screen usage to power modern and shared workspaces.

## Ergonomic & user-oriented

- Broad range of peripherals & accessories such as dual monitor stand for enhanced ergonomics.

\*Only available on select models

## Long work hours taking a toll on your eyes and health? Let us help!

Ergonomics is paramount to Fujitsu's design philosophy. The new Fujitsu Displays take desktop ergonomics to the next level, by combining **the best** that technology has to offer with user convenience and comfort.

### 6-in-1 stand base

- Tilt, swivel, rotate & adjust height to customize the display to your individual needs.
- Experience seamless automatic text orientation with the pivot function.

### IPS technology

- Utilize IPS panels for optimal colors & enhanced picture quality.
- Take advantage of screens with the perfect anti-reflection & calibration.

### Clean desk

- Enhance workplace flexibility with an integrated cable guide for tangle-free working & more space.
- All-in-One Experience: Patent backpack solution for ESPRIMO Mini PCs & LIFEBOOKs.

### Retina protection

- Low blue-light panel reduces damaging light while also maintaining color quality.
- Auto-brightness sensor minimizes eye strain, offers energy savings & optimizes brightness.

### Factory pre-calibration

- The factory pre-calibrated display provides high color fidelity for single & multi-monitor usage.

### Best-in-class housing options

- Marble grey & black housing colors meet individual preferences.
- Ultra-thin housing for shared desk & space saving scenarios.

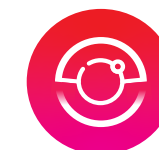

# Is desk sharing at work affecting your workforce's productivity? We've got you covered!

At Fujitsu, we practice product design from the user's viewpoint in line with customer needs. The new Fujitsu Displays offer users ease of working through the **best** smart workplace features to help you thrive in a multi-device environment.

## Dynamic presence sensor

- Recognizes & shuts down monitor when user leaves desk.
- Protects personal data by activating Windows password lock during the user's absence.

## Multi-functional webcam

- Microsoft Windows HELLO compatible with mechanical lever lock.
- Directional microphone that hides disturbing sounds.

## DisplayView™ suite

- Offers a simple & easy display configuration with just one click for a smart start.
- Comes with split-screen software that allows you to embed applications into your choice of layout.

## Holistic interface portfolio

- Supports universal use due to modern digital interfaces like DisplayPort, along with HDMI & legacy interfaces such as DVI & VGA.

## Optimal USB hub

- Introducing a worldwide first right-handed USB hub that provides an optimal cable course & highest ergonomics for most users.

## Planning to move your legacy systems to green tech? No problem!

Fujitsu has always maintained an unwavering commitment to resolve both user demands and environmental issues through **the best** use of information and communication technology. Building on this, the new Fujitsu Displays are highly reliable and eco-friendly devices with a long lifecycle.

### Long product lifecycle

- Prolonged product lifecycle supports long-term projects.
- Lifecycle can be further increased with feasible firmware updates by the user.

### Low failure rates

- Stringent quality control system guarantees minimal failure rates & almost no pixel defects.
- Reliable and robust 19-inch and 20-inch displays ideal for 24/7 usage.

### TCO 9.0 certification

- TCO 9.0 for 10<sup>th</sup> generation Displays as “early bird”.
- Meets criteria in terms of environment-friendliness, prolonged life cycle & reduced electronic waste.

### Eco-friendly

- Styrofoam-free packaging made of cardboard.
- All Fujitsu Displays are designed to be recyclable by almost 95%.

### Energy efficient

- Fulfills the highest level of Energy Star 8.0 ratings.
