

Fully focused on your desired business outcome

Co-created with our
specialists, backed by solid
IT solutions and
complemented by
comprehensive service
offerings

In today's rapidly evolving market landscape, we stand as a global leader in technology and business solutions, utilizing advanced technology to tackle business challenges and societal issues. Our rich heritage is rooted in continuous innovation and expertise, with a relentless commitment to facilitating our customers' success. The core of our strategy is customer centricity, and our objective is to serve as a reliable partner for our clients.

AI and Data

We support you in becoming a data-driven enterprise and to extract the potential value of your data by using AI as a reliable pattern to success. Experience and co-create ideas with one of the pioneers in the field of AI, test-drive them and bring them to life supported by our dedicated project team, data consultants and ecosystem of superpowers.

SAP

Fujitsu end-to-end SAP solutions and services provide a holistic view to build operational efficiency and optimize your processes by focusing on your SAP landscapes and automating your SAP operations. The aim is to drive your digital transformation by ensuring that you are a truly efficient data-driven intelligent enterprise with an agile capability to innovate.

Resilient data platforms

Data is your most precious jewel. Explore it, store it, manage it, protect it and perform with it! Fujitsu empowers organizations to monetize their data by reliably and efficiently providing the right data environments connected with the right data service levels for any business scenario at an optimal cost per gigabyte.

Looking for a cloud concept, but don't want to move all your workloads to the cloud?

You don't have to. We can support you with finding the right cloud for the right workload and can also offer innovative consumption-based IT models to strengthen the agility of your on-premise IT platforms and reduce risk with flexible monthly payment.

IT as a service

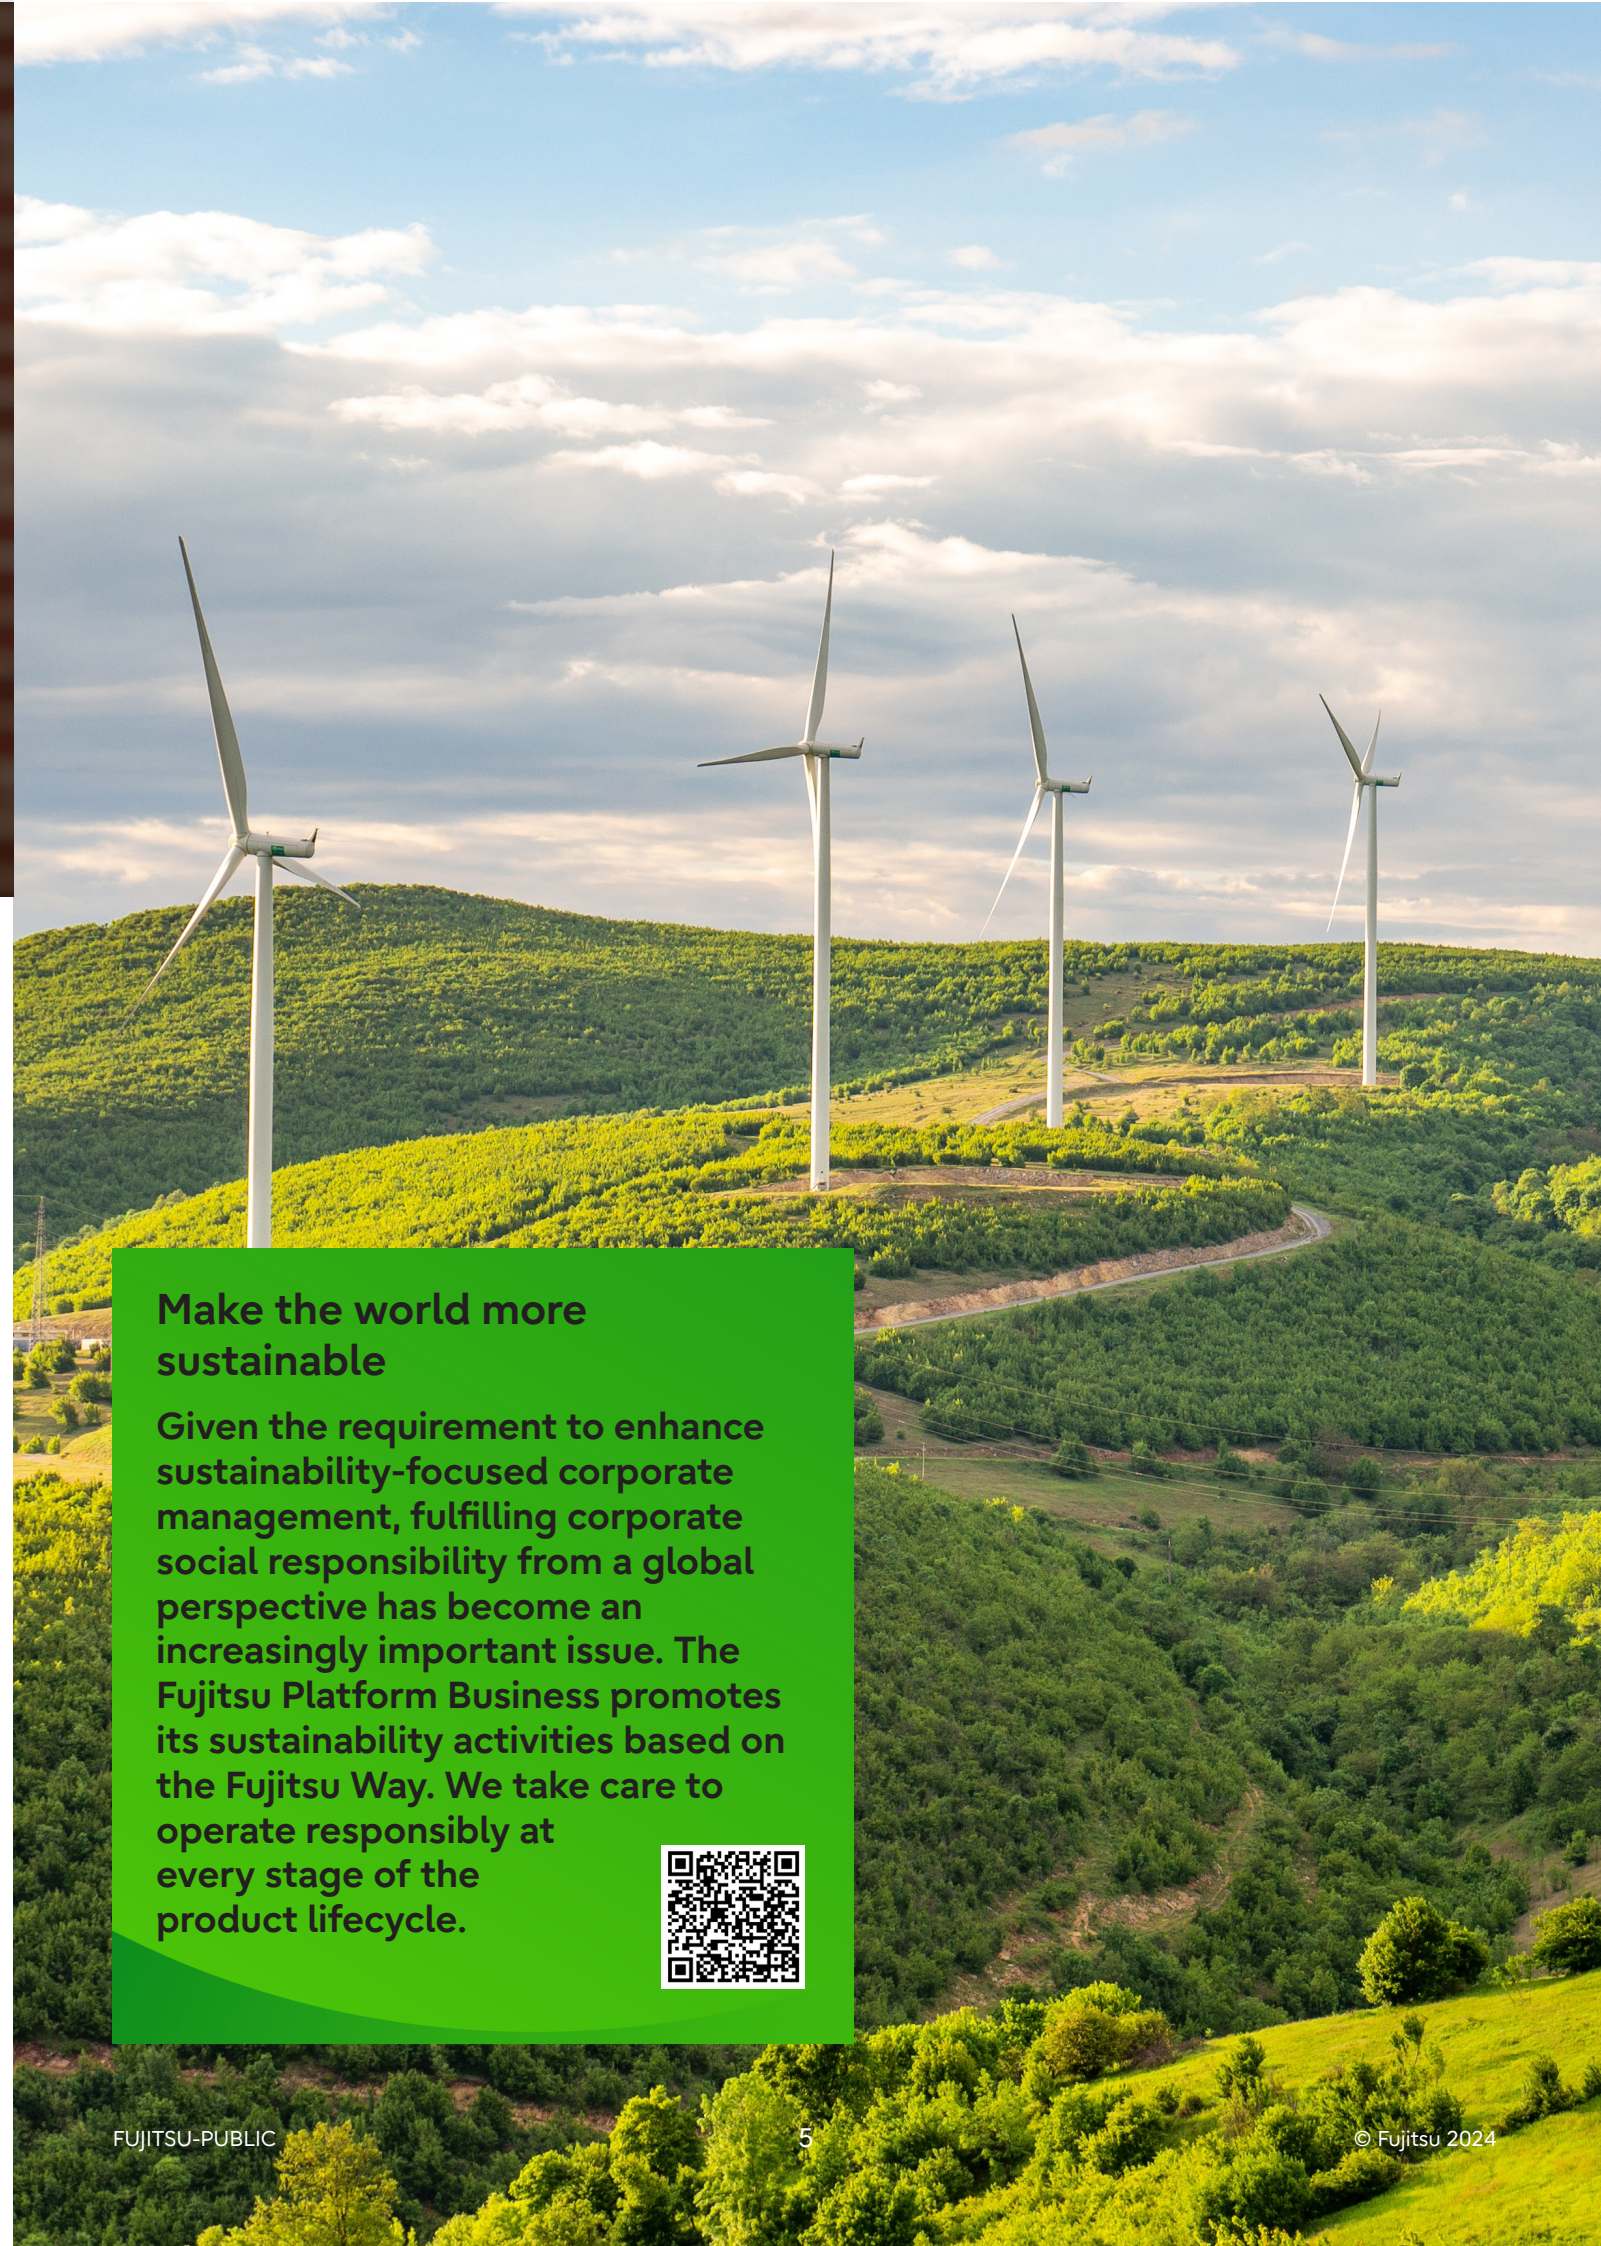

Consumption-based, as-a-service models are a smart alternative for a complex and sometimes disturbing move to the cloud. They will provide you with a financially transparent, technically scalable, and compliant IT setup for your business strategy in your own data center. Fujitsu uSCALE delivers flexible, monthly billed on-premise IT infrastructures "as-a-service" solution based on an in-depth review of customer needs.

Hybrid Cloud

Hybrid and multi-cloud is a reality for nearly 8 in 10 European organizations, but it is not business as usual. We help you find the right cloud for the right workload.

Make the world more sustainable

Given the requirement to enhance sustainability-focused corporate management, fulfilling corporate social responsibility from a global perspective has become an increasingly important issue. The Fujitsu Platform Business promotes its sustainability activities based on the Fujitsu Way. We take care to operate responsibly at every stage of the product lifecycle.

Whatever your area of interest, it can be backed by our broad and best-in-class portfolio of IT and security solutions compiling hardware, software and services. Our in-house experts are happy to test and implement the IT solutions for you and be at your side right from the beginning of your project until successful implementation – and of course will also be there for you to run and/or maintain your IT environment. On top, we are working with our numerous strategic partners to provide extra expertise. And of course, we will always keep an eye on meeting your sustainability goals.

IT Solutions for a digital world

Fujitsu supports you and your IT organization on your digital transformation journey end-to-end. We create solid solutions, which deliver the right foundation for business success.
