

The top 3 reasons to modernize your VMware Hyper-Converged Infrastructure

What's new in PRIMEFLEX

for VMware vSAN?

Fujitsu **PRIMERGY M7 Servers**

Best-in-class performance and energy efficiency for VMware workloads on industry-standard CPU technology

VMware vSphere 8

The enterprise workload platform for traditional and next generation apps

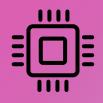

VMware vSAN 8

The enterprise-class storage virtualization software that provides the simplest path to hyper-converged infrastructure (HCI)

Boost performance

vmware

PRIMERGY RX2540 M7 with best VMware VMmark result for servers powered by Intel Xeon CPUs¹; delivers 3x better performance than RX2540 M5 and 2x better than RX2540 M6².

Leverage VMware vSAN 8 Express Storage Architecture architecture optimized for high-performance storage devices and boost performance by up to 4x, without compromising space efficiency.

VMware vSAN 8 delivers software-based deduplication and compression providing as much as 7x data reduction with minimal CPU and memory overhead.

¹ Source: VMmark 3.x Performance only results: 2 hosts, 4 total sockets ² Source: SpecPower results – RX2570 M7, RX2540 M6, RX2540 M5

PRIMERGY RX2540 M7:

Get 3:1 consolidation ratio compared to RX2540 M5 and 2:1 to RX2540 M6

PRIMERGY RX2540 M7:

Gain 15% power savings compared to RX2540 M6³

VMware vSAN 8 lowers storage TCO by up to 40% with enhanced data compression and adaptive storage efficiencies.

³ Assumption: M6:M7 consolidation ratio 2:1; 30% CPU load

Enable cloud connectivity

VMware vSAN 8 seamlessly integrates with cloud services from AWS, Azure or GCP delivering a common platform for on-premises and off-premises deployments.

VMware vSAN 8 allows to run legacy enterprise apps and modern cloud-native apps from a single platform.

VMware vSAN 8 accelerates cloud native app development with cloud native storage supporting all key storage API objects within Kubernetes.
