

Accelerate your SAP journey with Hybrid Cloud

Is cloud the go-to infrastructure model for every workload?

Workload migration is an **all-way street!**

Hybrid Cloud – a mix of on-premises and cloud – gives you the best of all data worlds for SAP-based infrastructure.

Better control over your data

More successful data analytics – derive actionable insights

First step to Hybrid Cloud for SAP infrastructure: analysis with Fujitsu SystemInspection Service for SAP Solutions

Get a detailed inventory of your SAP infrastructure across edge, core and cloud

Get insights into current workloads, performance and resource consumption

Factors to consider:

Security/legal/internal policy demands

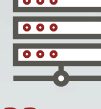

Availability of cloud skills

Required service levels

Performance demands

HA and DR requirements

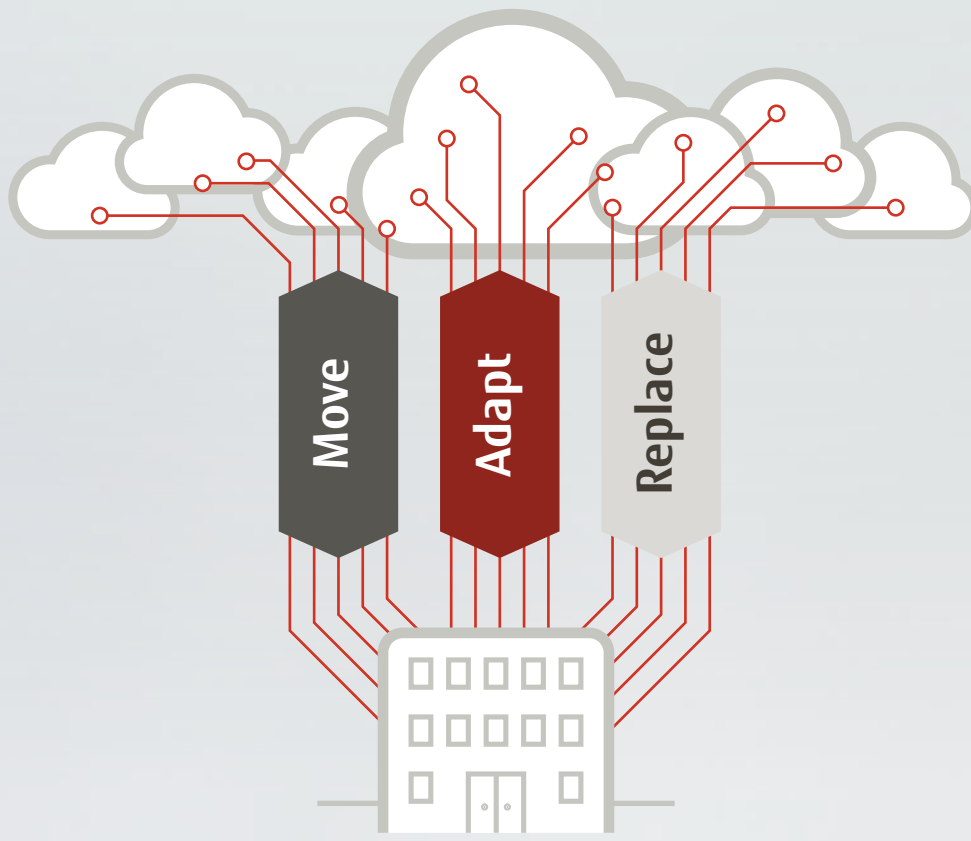

Fixed vs. flexible pricing

Short-term vs. long-term cloud resources

Deliverables

Post-implementation: before-and-after analysis of SAP performance to verify objectives are met

Business value :

No more play-it-safe overprovisioning

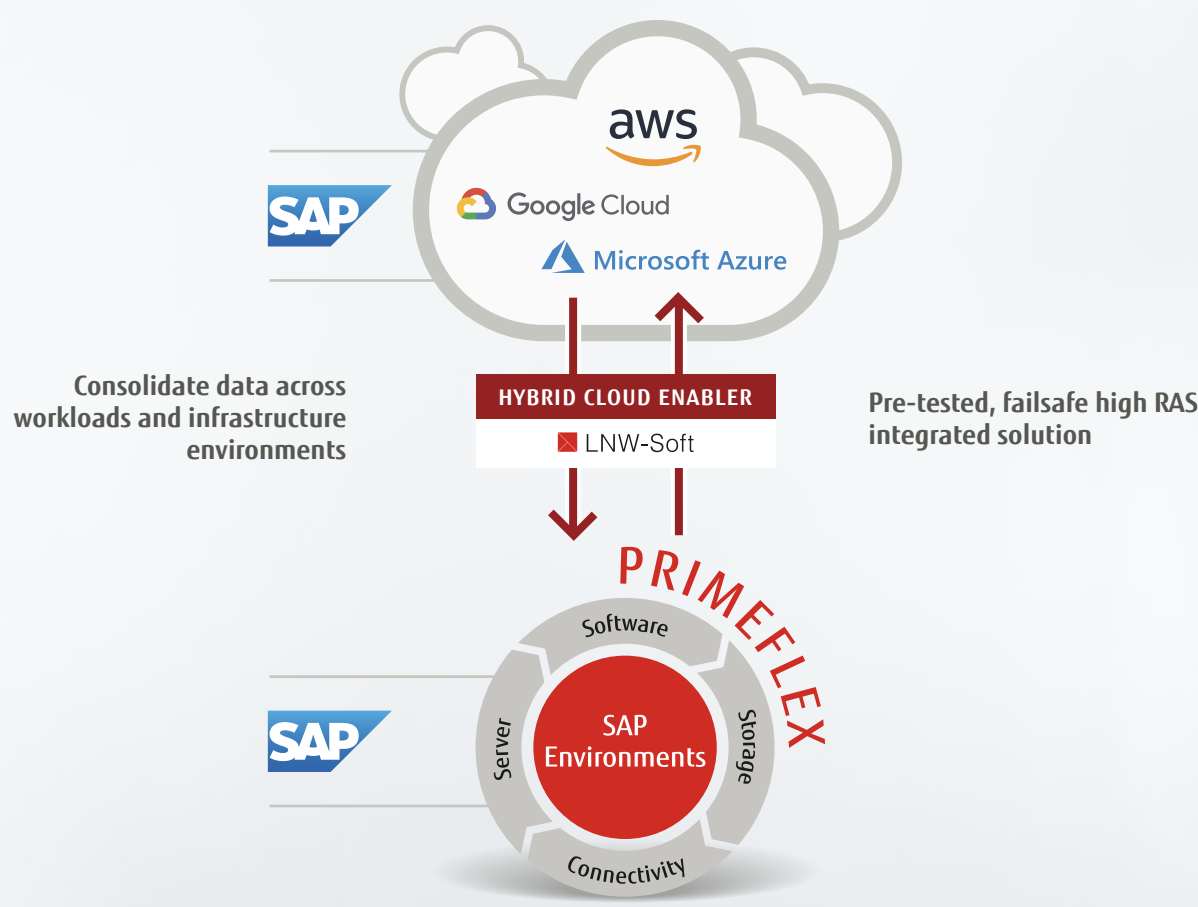

Better service quality (no performance bottlenecks)

Easier capacity planning

Hybrid-enabled PRIMEFLEX for SAP environments

With Hybrid Cloud, you need the right on-premises infrastructure.

Trust Fujitsu experience in data-driven hybrid transformation with SAP

8.9 billion

Executed SAP **Transaction** calls analyzed according to their resource consumption

608,000

Measured hours of SAP application runtime, tagged with a variety of performance metrics

15,500

Server configurations, analyzed and evaluated according to their SAPS capacity and much more

20 billion

Dialog steps, classified by Fujitsu performance experts according to their response time quality

17,300

SAP application instances, building workload profiles to be placed cost-efficiently

8,300

SAP systems, running on any platform (Fujitsu and non-Fujitsu), including SAP HANA and anyDB
