

Battery Control Update Tool Instructions

This tool will automatically check if your system is a targeted model, and identify an appropriate update-package for your model. Then the tool will download and apply the update package. Since the update-package varies according to the model and is designed only for certain models, please review these instructions carefully and then apply to your system.

End User License Agreement

You can use this software only upon the condition that you accept all of the terms below.

Please do not use the software if you do not agree with them.

Restrictions

- The software is not transferable.
- You may not modify, decompile, or reverse-engineer the software.
- You may not change any copyright information in the software.
- In no event will Fujitsu be liable for any damage caused by the software.

System Requirements

- Windows 10 (64-bit/32-bit)
- Windows 8.1 (64-bit/32-bit)
- Windows 8 (64-bit/32-bit)
- Windows 7 (64-bit/32-bit)

Important Notes

- Depending on the battery pack age/condition, the battery pack runtime on a charge will be reduced up to 35% after this update.
- ONCE THIS UPDATE IS APPLIED IT CANNOT BE UNINSTALLED
- All Fujitsu drivers and utilities need to be installed prior to the update.

How to use

1. Download the "FUJITSU Battery Control Update Tool" as described below:

Go to **Fujitsu support page** and proceed with the following actions:

- ✓ Select "Browse For Product".
- Select your "Product Line".
- Select your "Product Group" and "Product Family".
- ✓ Select your operating system.
- Select the folder "Applications"

- ✓ Select "Tools and Utilities"
- ✓ Download and install the Update for Battery Charging Control Utility
- 2. Execute BatteryCtrlUpdate.exe.
- 3. The tool will automatically check if your system is a targeted model, and identify an appropriate update-package for your model then download and apply it.
 - In case your system is a targeted model. If ONE of the following message(s) is displayed, your system is a targeted model. Please go to STEP 4.

products for the benefit of our End Users, both on new models and on those previously manufactured and sold.	
This update can reduce the potential of a battery-related thermal incident. We have determined that, as the battery pack used in a PC ages, a slight reduction in the charging voltage has a positive impact on maintaining the safe operation of the battery pack. Our Update detects battery age and status, and regulates charging voltages accordingly. We	~
